Functionality of Score-Writer:

Compose, display and play your own classical music sheets.

Advanced topics: Git & Multithreading

#	Name	How to Demo	Notes
1	Display sheet	Launch the app; the music sheet is displayed clearly in the GUI.	Possible expansion by adding new bars
2	Select a note	Press a button on the toolbar, clearly show which note type is selected	
3	Restart composition	Click the Restart button. All the notes are cleared	The display only updates when the mouse is in the area
4	Place a note	After selection, when a spot on the sheet is clicked on the note is shown there and values stored.	Flats (b) get shown as the sharp that comes before. RESTS ARE NOT NOTES.
5	Detect impossible positions	When you select a note that is too long for its place a message pop up.	Example: A semibreve not in the first beat.
6	Play sheet	Click the play button (▶️) and select it. The sound of each note is played when specified and for its duration.	
7	Stop playing sheet	Click the play button (▶️) and unselect it. The sounds stop instantly.	
8	Visualize notes correctly	Different notes can be distinguished	
9	Polyphonic harmonies	Add two notes at the same time	
10	Delete last note	Click the delete button. The note(s) that is furthest to the right is delete	The display only updates when the mouse is in the area. Might sometimes need to try twice.
11	Choose semitone	Select either the sharp (#) or flat (b) and see how the pitch slightly changes (a semitone)	Again, the display might be slightly different.
12	Change BPM	Change the number in the bottom. See the music play faster or slower.	Recommended 40
13	Choose intensity	Choose one of the buttons (pp, p, mp…) and see the intensity of the specific note change.	

14	Change title
